statinfer

Data Science Training and Applied R&D

Who are we ???

- We are industry professionals here to cater the growing need for providing specialized **Data Science training**

- We also focus on conducting **applied R&D** to latest Machine Learning, Deep Learning and AI challenges.

What we offer ?

- Training on
  - Data Analytics, Predictive Modelling
  - Machine Learning
  - Deep Learning
  - Bigdata Analytics and Distributed Computing
  - Data Visualizations and Storytelling
 - R, Python and TensorFlow

Courses Offered

1. R Programming
2. Data Science
3. Machine Learning
4. Python Programming
5. Bigdata Analytics
6. Data Science Case Studies
7. Tableau Visualizations and Story Telling
8. Azure Machine Learning
9. NLP & Text Mining
10. Deep Learning

How do we design our courses ?

- All the courses are designed and prepared by Statinfer in-house data scientists.

- All the programs are 100% hands-on.

- Each course has ample examples, lab exercises and industry related projects.

- Extreme care has been taken to make these courses suitable for a novice.

How do we design our courses ?

- Focus on business oriented approach

- Problem solving with strong foundation on the fundamentals.

- Designed the courses to suit a non-developer/non-programmer.

- Emphasis is on analysis and inference along with the tool/syntax

- Includes around 50 solved case studies

- Case studies to provide a multi-industry perspective.

Our Clients

- HPE
- KPMG
- HSBC
- OFS
- Lowes
- Yoda

Previous Trainings by Statinfer.com

- HSBC – Machine Learning using R
  - 200 participants
  - 7 batches
- HPE – Machine Learning using R and Python
  - 70 participants
  - 3 Batches in Bangalore
- Lowes - Machine Learning using Python
  - 25 participants
- KPMG
  - Machine Learning using Python-25 Participants
  - NLP and NLG using Python – 25 Participants

LMS Courses

- Access to advanced learning management system (LMS) which provides.

- The flexibility of 24x7 learning at your convenience.

How are we unique !

statinfer

- Best in class Corporate Trainers. Flawlessly designed learning programs.
- Courses for major tools and techniques in Data science eco-system.
- Comprehensive course material: from high level overview to deep-dive training in analysis, programming and implementation.
- Training tailored for your team's specific needs and Support after training.
- Blended learning model (instructor led and/or self-paced learning)
