Who we are?

Industry professionals providing specialized Data Science and Machine Learning Training

We conduct training programs on Machine Learning, Deep Learning and Artificial Intelligence
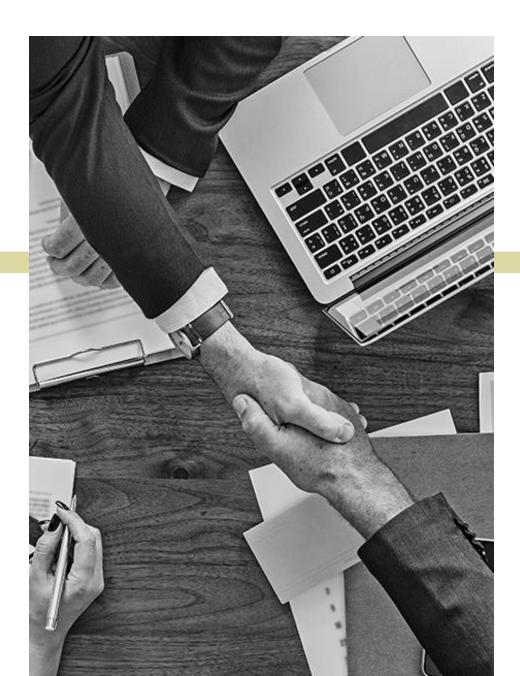

statinfer

We offer training on

We are specialized in Machine Learning and Data Science trainings. Currently we offer training on …

- Data Analytics
- Data Visualization
- Predictive Modelling
- Data Science
- Machine Learning
- Deep Learning
- Tools – R, Python and TensorFlow

We can make data science learning easy

- Balanced academic and business expertise
- We provide business sense to theory
- Our content fits perfectly between a college and industry

Business Model

We offer both class room trainings and self paced e-learning modules.

Testimonials

Well-paced training ideal for professionals with work experience. The content was tailor made for the mix of individuals that attended the training. Post training content that was shared was also very useful. And Venkat as a trainer rocks! He has the right mix of technical depth on ML topics as well as programing expertise. He has been able to grab the attention of trainees from beginning till the end of the day which I believe is an extremely difficult task. Hands on session helped individuals that attended the training to replicate it in their current work easily. Experts in ML as well as beginners both had learning opportunities through these trainings

Paromita Sen

Data Science Team Manager - HP
